# Asylum Seeker and Refugee Policies Around the World

1. Calculate each country's total refugee and asylum seeker population as a percentage of the total population of the country. For example: Switzerland – 113,481 (total asylum seeker/refugee population) divided by 8,500,000 (total population) multiplied by 100 = 1.33%
2. Which country had the highest percentage of asylum seekers/refugees in its population? Which country had the lowest?
3. Out of the five countries analysed in the table, which one do you believe has the best policies regarding acceptance and treatment of asylum seekers and refugees? Why?
4. Which one do you believe has the worst policies regarding acceptance and treatment of asylum seekers and refugees? Why?
