Sustainable Development Goals – Diamond Ranking

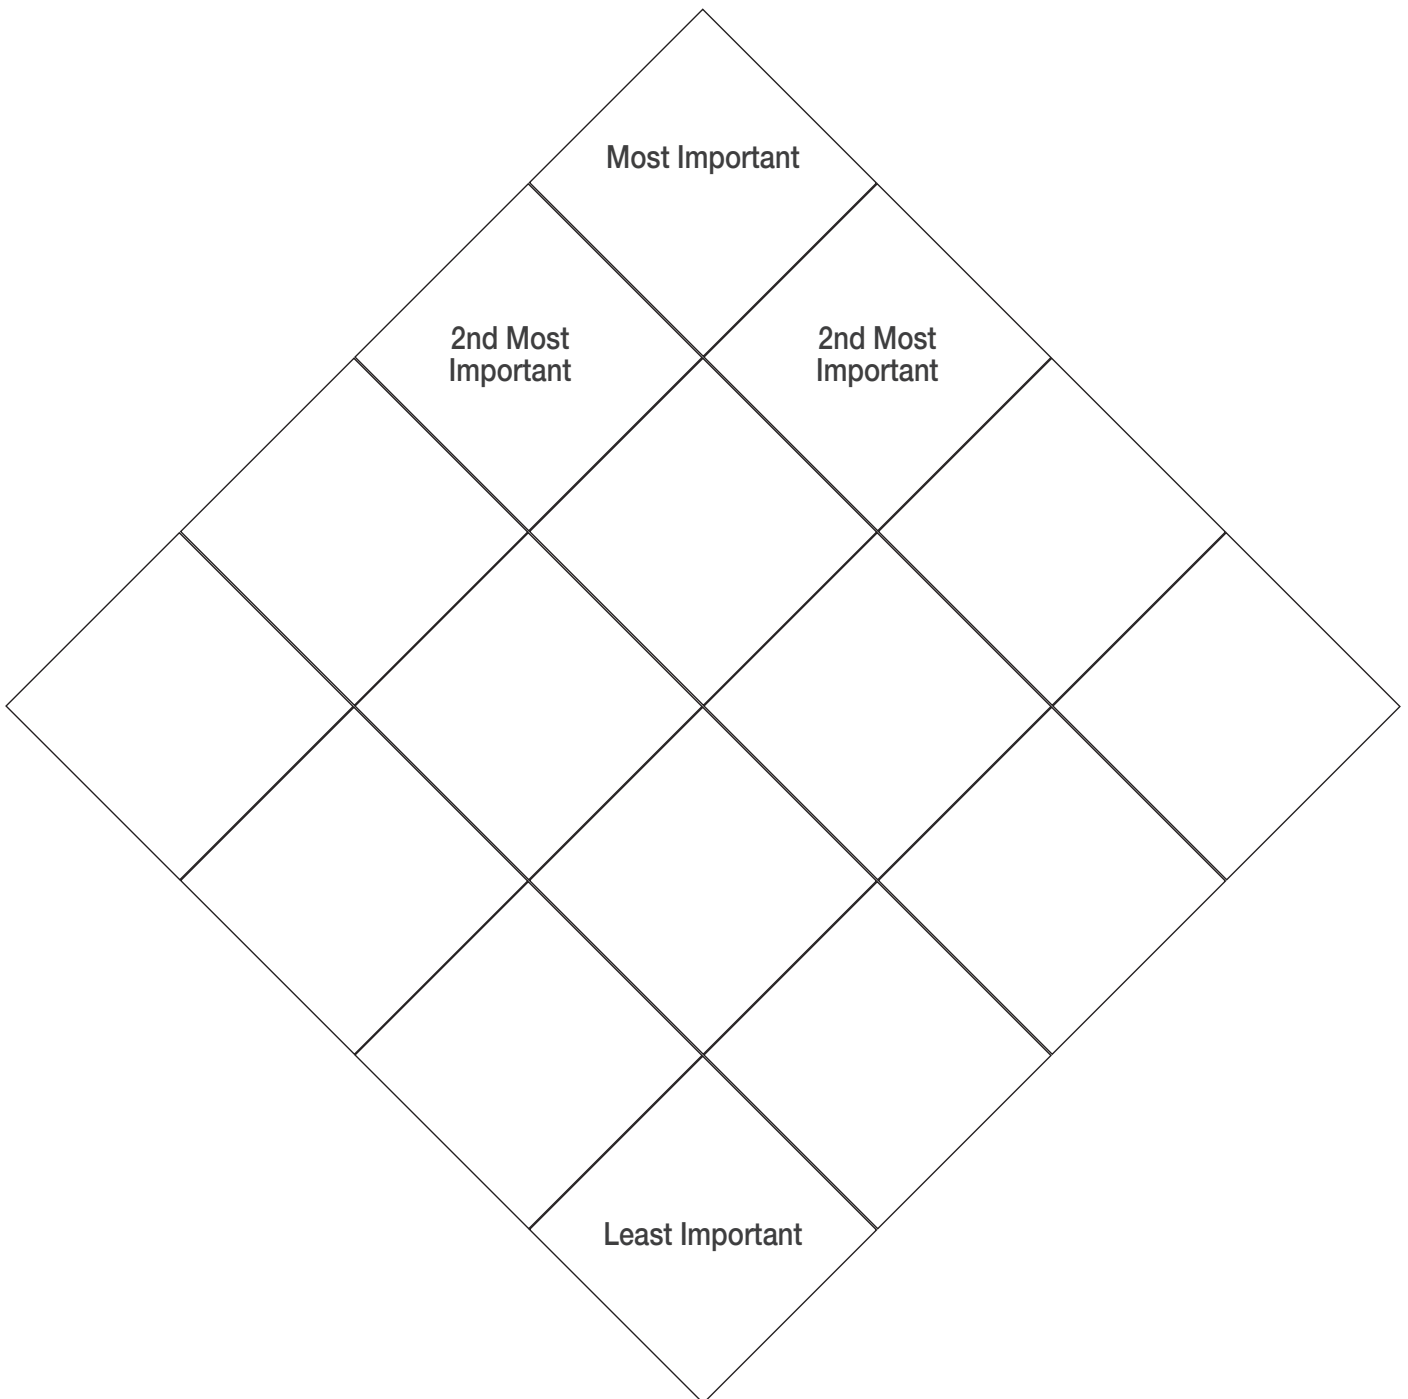

NAME:

Sustainable Development Goals – Diamond Ranking

The diamonds on the first page represent the 17 global goals that were set by the United Nations in 2015. These broad goals have specific targets that each nation is aiming to meet by 2030.

1. Cut out each of the diamonds
2. Your task is to arrange the diamonds into a larger diamond (see example below). Whichever of the 17 goals you believe is the most important for the development of the world will go at the top of the diamond. Next, you will decide the next two most important goals and place them on the second row. Continue doing this until you get to the bottom, where the least important goal will go.
3. You will notice there are 17 goals, but there is only room for 16 diamonds. The leftover goal can be excluded from this activity.
4. Once you are happy with your rankings, find a space in your book and glue it in.

REFLECTION QUESTIONS

1. Which goal did you place at the top of the diamond? Why do you believe that this is the most important goal for world development?
2. Which goal did you place at the bottom of the diamond? Why do you believe that this goal isn't very important for world development?
3. Which goal do you believe is most important for Australia as an individual country? Why?
4. Go to https://www.vinnies.org.au/page/Our_Impact/ Have a look at some of the things the St Vincent de Paul Society does both in Australia and overseas. Which Sustainable Development Goals is the St Vincent de Paul Society helping with?
